📍 Vancouver, BC

Summary

As a front end specializing in React and Node, I have experience developing web applications using React and server-side development using Node.js, allowing me to develop full stack applications. I am passionate about self-growth and am always working to learn the latest technologies. I am currently working on 1+ front-end projects for my diploma program. I am excellent at working in teams and enjoy collaboration with peers

Skills

Projects

Whistleblowing system

-February 2023 to April 2023

Summary

A whistleblower application that allows anonymous submissions. Employees and HR people are target users. Employee reports and account data are encrypted and secured. Users can also post anonymously if they wish.

- Encryption and decryption are performed using Bcrypt.
- Nodemailer constructs a real-time notification and mail-sending system.

React.js/ Node.js/ MongoDB/ Redux toolkit/ Tailwind/ Nodemailer/ Bcrypt/ GridFs

Real Time Chat App

-February 2023

Summary

Real-time Chat App using Socket.io.

- Built as user data holder using Redux toolkit
- Build an API using Socket.io

React.js/ Node.js/ MongoDB/ Redux toolkit/ Tailwind/ Socket.io

Education

Cornerstone International Community College of Canada | 2022.05 - 2023.04

Web and Mobile application development Diploma
