

# RYOSUKE SAITO

## FRONT-END DEVELOPER

### Summary

As a front end specializing in React and Node, I have experience developing web applications using React and server-side development using Node.js, allowing me to develop full stack applications. I am passionate about self-growth and am always working to learn the latest technologies.

### Projects

#### Whistleblowing system

A whistleblower application that allows anonymous submissions. Employees and HR people are target users. Employee reports and account data are encrypted and secured. Users can also post anonymously if they wish.

##### **Tools:**

React.js/ Node.js/ MongoDB/ Redux toolkit/ Tailwind/ Nodemailer/ Bcrypt/ GridFs

#### Real Time Chat App

This web application is a chat application that reflects user activity in real-time. It shows messages sent and received, user login status, typing status, etc. Designed a database that would separate chat groups for individual users and chat groups for all users.

##### **Tools:**

React.js/ Node.js/ MongoDB/ Redux toolkit/ Tailwind/ Socket.io

#### Portfolio

This is my portfolio, showcasing the projects I have worked on and my skills. This project is created using Next.js and designed in Figma.
